

Congress of the United States
Washington, DC 20515

148

March 1, 2018

The Honorable Ajit Pai
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Pai:

As co-chairs of the Congressional Spectrum Caucus, we are pleased that the Federal Communications Commission (Commission) has initiated a proceeding to examine so-called "mid-band" spectrum for flexible broadband use and its potential designation for wireless broadband services. Due to the particular propagation characteristics of mid-band spectrum, other countries have already begun to focus on its use for next generation wireless services. Making spectrum available will be critical to maintaining U.S. leadership in bringing fifth generation wireless, or "5G," to our constituents.

We understand that some of the spectrum the Commission is evaluating is the 3.7-4.2 GHz band, which is currently used primarily by satellite companies to transmit television programming and network services to earth stations around the country. The ability of wireless companies to use that spectrum – as well as protect incumbent operators – will depend on exactly how many earth stations exist, where they are located, and how much of the spectrum is currently being used. In turn, a complete record of those earth stations will allow the Commission to determine how this mid-band spectrum can be made available for new terrestrial use.

As the Commission moves forward with this proceeding, we therefore believe the Commission should confirm exactly how many earth stations are in operation, their location, and the specific spectrum in use at each location. You may wish to provide users of these earth stations with an opportunity to confirm the details of their operations. A good understanding of the spectrum landscape at 3.7-4.2 GHz will allow the Commission to accurately assess the use of the spectrum for wireless broadband.

Thank you for your consideration. We respectfully request a timely reply regarding this important matter, and we look forward to continuing to work together with the Commission to advance federal spectrum efforts that keep pace with growing demand.

Sincerely,

Doris Matsui
Member of Congress

Brett Guthrie
Member of Congress

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON

OFFICE OF
THE CHAIRMAN

July 23, 2018

The Honorable Doris Matsui
U.S. House of Representatives
2311 Rayburn House Office Building
Washington, D.C. 20515

Dear Congresswoman Matsui:

Thank you for your letter on increasing flexible use, including terrestrial broadband use, in the 3.7–4.2 GHz band. I agree with you that our ability to intensify the use of this band is closely linked to gathering an accurate picture of how this spectrum is currently being used by incumbent earth stations.

That is exactly why Commission staff established a filing freeze on new applications for earth stations on April 19, 2018, and why stations have a 180-day window to register with the Commission and provide certain needed information (such as their locations) for us to proceed with this rulemaking. And that is why the Commission unanimously adopted at our July meeting an information collection targeted to better understanding the use of the band by existing satellite operators. I agree with you that with this information, the Commission will have “a good understanding of the spectrum landscape at 3.7–4.2 GHz [that] will allow the Commission to accurately assess the use of the spectrum for wireless broadband.”

Thank you for your continued interest in this matter. I look forward to continuing our work to further America’s 5G future. Please let me know if I can be of further assistance.

Sincerely,

Ajit V. Pai

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON

OFFICE OF
THE CHAIRMAN

July 23, 2018

The Honorable Brett Guthrie
U.S. House of Representatives
2434 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Guthrie:

Thank you for your letter on increasing flexible use, including terrestrial broadband use, in the 3.7–4.2 GHz band. I agree with you that our ability to intensify the use of this band is closely linked to gathering an accurate picture of how this spectrum is currently being used by incumbent earth stations.

That is exactly why Commission staff established a filing freeze on new applications for earth stations on April 19, 2018, and why stations have a 180-day window to register with the Commission and provide certain needed information (such as their locations) for us to proceed with this rulemaking. And that is why the Commission unanimously adopted at our July meeting an information collection targeted to better understanding the use of the band by existing satellite operators. I agree with you that with this information, the Commission will have “a good understanding of the spectrum landscape at 3.7–4.2 GHz [that] will allow the Commission to accurately assess the use of the spectrum for wireless broadband.”

Thank you for your continued interest in this matter. I look forward to continuing our work to further America’s 5G future. Please let me know if I can be of further assistance.
